CONSTRUCTION INDUSTRIES UPDATE APRIL 8, 2020

It is possible for your employees to spread COVID-19 to other employees or their family members. You need to have a plan in place. Designate a safety officer at each site who is responsible for educating employees and ensuring that guidelines are followed.

- Stay home when sick and to avoid contact with others unless you need to seek medical attention.
- Individuals with a fever, cough or influenza-like illness, regardless of travel history should call the St. John's Health hotline at 307-739-4898 options 3 for a phone evaluation. If you are having a true medical emergency, please call 911.
- Wash your hands often with soap and water for at least 20 seconds. Use of temporary hand washing stations and hand sanitizer are options for those sites without running potable water.
- Cover your coughs and sneezes. Wear a face cover when you can't stay 6' away from others.
- Clean and disinfect frequently touched surfaces such as tools, doorknobs, light switches, counter tops, faucets, sinks, phones, keypads, etc.
- Follow advice from the CDC on how to protect yourself.
